

## **Civil Engineer, P.E. or F.E.**

T-E INCORPORATED, the leading site design and construction firm in Northeast Indiana, is looking for a Civil Design Engineer who can work both independently, and collaboratively with colleagues and clients. Tasks include work required for site layout, utility routing, sanitary/storm sewer design, roadways, grading/earthwork, erosion control, stormwater management systems, stormwater pollution prevention plans, and more. T-E INCORPORATED prides itself on being the able to provide clients with a “field to finish” design-build product for site development. We survey it, we design it, we build it.

### **Responsibilities and Duties**

- Design and create site layout plans in accordance with client’s needs and review agency requirements
- Effectively communicate and collaborate with, client and project team members regarding project status, design, deliverables
- Complete assigned tasks in an orderly and timely manner
- Coordinate with T-E’s construction division through project construction process

### **Qualifications and Skill**

- Active P.E. or F.E. License
- 6 ± years of Civil Site Design experience preferred
- Experience in Commercial & Residential Site Development
- Experience with authoritative codes and regulations, designing subsurface utilities (sanitary and water), site grading, storm sewer systems and facilities, land disturbance permitting
- Knowledge of AutoCAD, Civil 3D, hydraulic computation software and Microsoft Office
- Ability to work independently as well as in a team environment

### **Benefits**

- Incentive Compensation
- Health Insurance, Long Term Disability, Life, Dental and Vision Insurance
- PTO (Paid Time Off) & Holidays
- 401(k) Plan with company match
- Continuing Education/Professional Advancement and Tuition Reimbursement
